

Playing with the Boys' Team

A life dedicated to microbiology and helping others

Staphylococcus aureus

Please Join Us to Hear

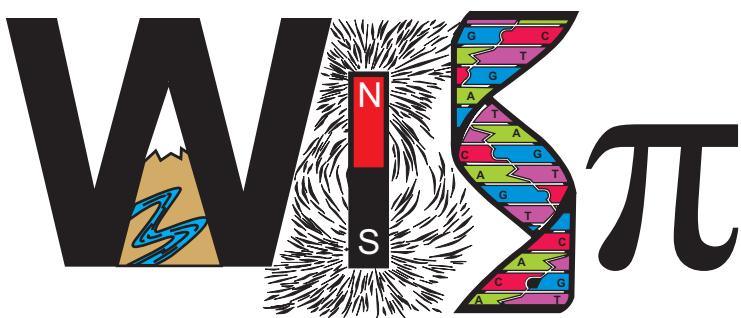

Dr. Anne Zayaitz, Kutztown University
Wednesday October 22, 2008, 7-8 pm
Boehm Science Building Room 260

Research is only one part of the life of a scientist. Scientists are also teachers, advisors, parents, and community members. We each choose a balance that is right for us.

In 1984, young Anne Zayaitz walked away from prestigious Cornell University with her freshly minted PhD in hand. She was the first woman hired for a tenure track position in the sciences at Kutztown University and was the first woman to get tenure in the sciences. Now she's the Interim Associate Dean of the College of Liberal Arts and Sciences! Throughout this journey, she's always kept in mind the importance of helping others.

Dr. Anne Zayaitz will share her stories of her experiences both as a microbiologist and as a teacher who has dedicated much of her life to helping students.

Everyone is welcome!
