

# Chasing Glaciers: Ice and Climate from Alaska to the Andes

Patagonia, Chile

Cordillera Huayhuash, Peru

Upper Yukon River Basin, Canada

## Please Join Us to Hear

**Joan Ramage, Ph.D., Lehigh University**  
**Wednesday November 12, 2008, 7-8 pm**  
**Boehm Science Building Room 260**

Joan Ramage is an earth scientist who looks at the world from space with electronic eyes that “see” the invisible microwave light reflecting off our planet. She answers questions in many fields, including geoarchaeology, volcanic hazards, glacial changes, and climate change. Raised in Ithaca, New York, she now teaches and researches at Lehigh University where she has published numerous scientific papers in highly reputable international journals and is an active member of both the American Geophysical Union and the Geological Society of America.

Dr. Ramage will speak to the community to share stories of her extraordinary experiences, traveling the world as a research scientist and teacher.

**Everyone is welcome!**
