THEORY BUILDING
CONCEPTS: Family values, Juvenile delinquency
  1) Define the concepts (conceptualization).
  2) Develop measures of the concepts (operationalization).
  3) Identify the independent and dependent variables.
  4) State the working and null hypotheses using the variables.
  5) Choose and explain a research design.
  6) Discuss the potential threats to internal and external validity.
  7) Does the hypothesized relationship meet the four criteria for causation? Explain your response.
  8) What is the direction of the relationships, positive or negative?

PROGRAM EVALUATION
  1) Identify and operationalize any concepts.
  2) State the working and null hypotheses using the variables.
  3) Choose and explain a research design including the threat to internal and external validity.

The effect of a youth after school program on juvenile delinquency
