

XHTML In-class Exercise

Create a web page (name it index.html on bill) with the following items:

1. A web page title consisting of your name
2. A web page heading consisting of your name
3. An unordered list that will be developed over the semester that will contain links to assignments – title it “Assignments”. Create one entry in this list called ‘Project’ but don’t add a link for it yet.
4. An unordered list the web languages we will be using and indicate your experience level (none, beginner, advanced, expert) for each of these languages. Also add any additional web languages you know.
 - a. XHTML
 - b. CSS
 - c. JavaScript
 - d. PHP
5. An ordered list of at least 3 expectations you have for this course. One of these expectations can NOT be “get an A”.
