Homework 8 – SPARQL

Put the code for the working queries in a file linked from your home page.

Write the following queries for your university ontology.
1. List the name and ID for all undergraduate students.
2. List the name of all professors (not associate professors).
3. List the name and ID for all students that have Frye as an advisor.
4. Return the name of each academic staff member and the count of their advisees.
