

## CSC 343 – Operating Systems, Fall 2020 First Day Handout

**MonWed 3-4:20, Zoom classes & recordings,** <http://faculty.kutztown.edu/parson>

**Class-time Zoom for CSC343: See D2L Course CSC343 -> Content -> Overview for the link.**

**IF you don't want to be recorded or are a minor,** use PRIVATE ZOOM CHAT to me for questions.

**Dr. Dale E. Parson, [parson@kutztown.edu](mailto:parson@kutztown.edu), Office hours:** <https://kutztown.zoom.us/j/94322223872>

**Office Hours Monday 1-2, Tuesday 3:30-4:30, Wednesday 12-2, Thursday 3:30-4:30 or by appt.**

This course is an introduction to the basic software components of an operating system. Topics include process management, storage management, processor management, auxiliary storage management, evaluation of an operating system's performance, networks, operating system security, case studies of particular operating systems.

**Prerequisite:** CSC 237 or CSC 253 AND completion of 18 credits of CSC courses numbered 125 or higher AND a GPA in the CSC courses of 2.25.

### **Recommended Textbook:**

*Operating System Concepts*, 10th Edition, Silberschatz, et. al. (9<sup>th</sup> edition is OK)

**OR** *Operating System Concepts Essentials*, 2nd Edition, Silberschatz, et. al. (9<sup>th</sup> edition) & *Essentials Edition*. Chapter numbers vary.

**Grading** (A = 92:100, A- = 90:91, B+ = 87:89, B = 82:86, B- = 80:81, C+ = 77:79, C = 70:76, D = 60:69, F = 0:59)

Projects 100% divided equally among the project assignments.

### **Programming project assignment grading criteria**

Grading rubrics will be part of each assignment handout. Late penalty is 10% per each day late, up until I go over the solution. Any assignment turned in after that is worth 0%.

We will use the CS&IT documentation requirements:

<http://faculty.kutztown.edu/parson/CSCDocumentationStandards.pdf>

### **The academic integrity policy:**

<http://faculty.kutztown.edu/parson/AcademicIntegrityPolicy.pdf>

Please read the above policy statement.

You may openly discuss ideas, algorithms, pitfalls, and the use of programming tools.

You may not share code, test drivers or test data except within groups for group projects.

Class attendance is not graded, but I will be teaching using data sources and concepts both inside and outside the scope of the textbook. You are responsible for all material covered in class, including technical information, coding standards and conventions, verbal specification of assignments, and your questions about topics that are not clear to you. Please, there should be no classroom conversations, cell phones, text messaging, eating, sleeping, obscenities, listening to music or other disruptions of the class.

If you have already disclosed a disability to the Disability Services Office (215 Stratton Administration Building) and are seeking accommodations, please feel free to speak with me privately so that I may assist you. If you have an injury sustained during military service including PTSD or TBI, you are also eligible for accommodations under the ADA and should contact the Disability Services Office.

If you have preferred pronouns for yourself, or a name that differs from the MyKU roster, please let me know.

Week	Text chapters	(Essentials Chapter / 10 <sup>th</sup> Edition Chapter) Lecture Topics
1	1	Introduction, computer architecture, hardware / software interface, history
2	2, P <sup>1</sup>	State-machine based simulation architecture in Python.
3	3	Processes, inter-process communication (IPC), modeling using state diagrams
4	4, 5 (10 <sup>th</sup> 4, 6) P <sup>2</sup>	Threads, thread libraries, queuing, related state machine models
5	5,6(10 <sup>th</sup> 5,6 )	Process synchronization, CPU scheduling
6	6 (10 <sup>th</sup> 7,8ish)	CPU scheduling, deadlocks
7	7 (10 <sup>th</sup> 9), P <sup>3</sup>	Main memory, memory hierarchies, swapping, paging
8	8 (10 <sup>th</sup> 10)	Review.
9	8 (10 <sup>th</sup> 10)	Virtual memory, scheduling memory
10	9,10(10 <sup>th</sup> 11,13)P <sup>4</sup>	Mass storage systems, File system interface
11	11 (10 <sup>th</sup> 14)	File system implementation, directories, allocation / free space management, NFS
12	12 (10 <sup>th</sup> 12)	Disk scheduling, swap space management, RAID
13	12 (10 <sup>th</sup> 12)	Input-output (I/O) systems, buses and multiprocessor interconnectivity
14	P <sup>5</sup>	Preparation for final exam project.
15		Final project work session.

There will be 5 project assignments and no exams. A compressed, 1-week assignment 5 takes the place of an exam.

**KU Campus Mask policy:** Resident students must wear a mask anytime they are outside of their personal room and within a building or with anyone else but their roommate. Commuter students must wear a mask anytime they are on campus within a

<sup>1</sup> Project 1 is a practice project for learning how to construct, compile and simulate state machines based on the UML (Unified Modeling language) State Diagram notation. **Following project sequence is a draft plan.**

<sup>2</sup> Project 2 involves building state machine models to simulate various CPU scheduling algorithms.

<sup>3</sup> Project 3 involves building interacting state machines to share resources and avoid / risk deadlock.

<sup>4</sup> Project 4 involves building a simulation model to simulate memory mapping, swapping and page scheduling.

<sup>5</sup> Project 5 involves building a simulation model to simulate file system space management or I/O scheduling.

building or with anyone. The course is 100% via Zoom at class time. I will record & post class videos, but want you there at class time.

**PA:** The Secretary's Order requires individuals to wear a face covering, in both indoor public places and in the outdoors when they are not able to consistently maintain social distancing from individuals who are not members of their household, such as on a busy sidewalk, waiting in line to enter a place, or near others at any place people are congregating. Whether inside in a public place or outside, and when wearing a face covering or not, everyone should socially distance at least 6 feet apart from others who are not part of your household.
