

Software Requirements Specification Presentation

Date: **Thursday, December 5**

Each team needs to give a **10-minute presentation** on their **software requirements specification (SRS)**.

In your presentation, you need to include followings:

- Product Overview—General overview about the project
- Requirements Traceability Matrix—Show a condensed table outlining the Requirements Traceability Matrix; for this you only need the requirement name, owner, and priority
- Use Case Diagrams—Any new use case diagrams
- Use Case Description—Walk through 3-4 use cases based on the prioritization in the Requirements Traceability Matrix
- Non-Functional Requirements—Detailing the non-functional requirements

Submission

The team leader must email me the final version of the SRS document and slides for the presentation by the **noon of Wednesday, December 4**.
