

Check if you have an area on acad (cistrd) under your root (your login directory). It would be in subdirectory **public_html**

If so, the URL corresponding to this directory is

[http://acad.kutztown.edu/~\(your login id\)_](http://acad.kutztown.edu/~(your login id)_).

Make sure that you set permissions correctly for files you place there (644). Subdirectories must have permissions 755.

If the web area isn't present, inform the course instructor today.

Do **not** put files containing code in this area.
